RE: LO9100000 - Kankakee County - Kankakee/Rober
Appliance
ILL80010423

Dear Mr. Beachely:

I have enclosed a copy of the most recent correspondence from Kankakee Industrial Disposal (KID) evidencing that pH samples of the soil were taken after the clean-up of our facility located at 2207 W. Station Street, Kankakee, Illinois.

With the exception of one small area, the samples indicated the area was within the required range. The stone that was applied after the clean-up will bring the one area in question within the normal or neutral range.

Should you have any questions, please contact me.

Very truly yours,

Wendell D. Provost, Esq.
